Incharge Academia-Industrial Lisison
Cell: 0333-6519999
Introduction of the Workshop

Higher Education Commission (HEC) Pakistan aims at motivating and facilitating the Higher Education Institutions (HEI) to struggle for research as a top priority in future for a sustainable economic growth and knowledge based economy. HEC has already established Office of Research Innovations & Commercialization (ORIC) in the universities to ensure the quality research that will create a link between academia and industry for commercialization.

Prof. Dr. Muhammad Ali (a well renowned scientist) assumed the charge as a Vice Chancellor, Government College University, Faisalabad on December 18, 2014. He took many progressive initiatives for the university. Under the directions of dynamic and vibrant Vice Chancellor ORIC is promoting the research culture in the University. In this connection, GCUF is hosting a one day National Workshop “How to develop strong linkage between academia and Industry?” on 7th December, 2015 under the auspices of HEC, Pakistan at Iqbal Hall, Government College University, Faisalabad.

The Workshop will provide platform to both academia as well as industry to transform the invention (pure knowledge) into innovation (product and production process). To ensure its impact on the knowledge based economy as a whole, this one day event will bring the knowledge-based revolution in Pakistan by motivating personals from both academia and industry to utilize state-of-the art and high end technologies for rapid economic development of innovative products.

Aims and objectives

- To promote and establish a strong linkage between academia and Industry
- To provide a common platform for both academia and industry to interact, collaborate and share innovative ideas and concepts
- To promote the technology revolution in Pakistan
- To create an image of Pakistan as a nation that rich in the state of art workforce, fully capable of developing innovative products and providing high-tech services to the industry

The ORIC-GCUF is coordinating with the local industry in Faisalabad and all over the Pakistan to promote the knowledge based economy.

The presentation session will be followed by the panel discussion consisting of experts both from academia and industry to answer the queries for all stake holders and participants.

Registration fee & accommodation on actual basis per night.
